

SUSTAINABLE AND GREEN BY DESIGN

Smarter Compressed Air for Food & Beverage and Packaging Facilities

DIRECTAIR® delivers clean, efficient, food-grade compressed air with 100% Uptime Guaranteed. No capital expense. No maintenance. No production delays. That waste drives up emissions, utility bills, and maintenance costs. DIRECTAIR® eliminates the waste.

Delivered as a utility, DIRECTAIR® gives you clean, efficient air without the cost or complexity of owning and maintaining the system. Every installation is built for performance, with real-time monitoring and proactive service that reduce energy use, lower emissions, and improve reliability.

DIRECTAIR® helps you cut energy use by **up to 50%**, reduce your carbon footprint, and conserve water by minimizing or eliminating cooling needs. You get better performance, lower costs, and measurable sustainability gains from day one.

Why Leading Food, Beverage & Packaging Brands Trust DIRECTAIR®

100% Uptime Guarantee	Up to 50% Energy Savings	No Capital Expense	Zero Maintenance Burden	ESG & LEED Alignment	Food-Grade Compliant Air
Keep your packaging lines and process air running with no unplanned downtime, ever.	Our high-efficiency systems eliminate waste and reduce your energy bill.	Compressed air is delivered as a utility. You pay for air, not equipment.	We own, monitor, and maintain the system, your team stays focused on production.	Cut emissions, reduce energy use, and hit sustainability goals faster.	Dry, clean, oil-free air that meets the strictest industry standards

Built For Food & Beverage and Packaging Sustainable Compressed Air, Without The Waste

Reduced Energy Consumption	Lower Carbon Emissions	Eco-Friendly Operations	Predictive Maintenance & Monitoring
<p>By right-sizing compressed air supply, DIRECTAIR® provides efficient systems that consume less energy, already saving customers over 550,000,000 kWh of electricity.</p>	<p>DIRECTAIR® has helped customers reduce their carbon footprint by eliminating waste and operating at peak efficiency, resulting in a reduction of nearly 4 million metric tons of CO₂ emissions.</p>	<p>DIRECTAIR® is designed to support sustainability initiatives, including corporate ESG goals, while significantly reducing the environmental impact of industrial compressed air use.</p>	<p>Advanced real-time monitoring has prevented unnecessary energy spikes and equipment failures, saving our customers nearly \$418,000,000 in total energy cost savings.</p>

Traditional Systems

DIRECTAIR®

<p>Energy Efficiency</p> <p>Wastes up to 50% of energy, according to the U.S. Department of Energy, due to leaks, artificial demand, and inefficient systems management.</p>	<p>Energy Efficiency</p> <p>DIRECTAIR® is up to 50% more efficient than conventional compressor rooms, delivering the air your food and packaging lines need with zero wasted energy.</p>
<p>Carbon Footprint</p> <p>High emissions due to inefficient compressors, overuse, energy waste, and lack of system optimization, leading to unnecessary environmental impact.</p>	<p>Carbon Footprint</p> <p>3,699,801 metric tons of CO₂ saved with DIRECTAIR®, equivalent to removing 803,000 gas-powered cars from the road.</p>
<p>Maintenance & Waste Reduction</p> <p>Over 70% of manufacturers lack real-time monitoring for their compressed air, leading to energy waste and inefficiencies.</p>	<p>Maintenance & Waste Reduction</p> <p>DIRECTAIR® uses predictive maintenance & 24/7 monitoring to prevent failures before they occur, reducing downtime, waste, and risk in critical production environments.</p>
<p>Energy Savings</p> <p>Consumes more energy due to constant operation and inefficiencies, leading to higher utility bills and greater environmental impact.</p>	<p>Energy Savings</p> <p>Saved over 5.2 billion kWh, enough to power 490,000 homes and reduce customer energy costs by more than \$418 million.</p>
<p>Regulatory Compliance</p> <p>Harder to track sustainability metrics and maintain compliance with energy efficiency standards.</p>	<p>Regulatory Compliance</p> <p>DIRECTAIR® helps meet corporate ESG goals and aligns with food safety and clean-room air quality standards.</p>
